UNESCO Recommendation on Science and Scientific Researchers (2017)

- 195 countries (including yours) in 2017.
- Each national government is required to produce a report about practices and conditions of science in 2021 and each 4 years.

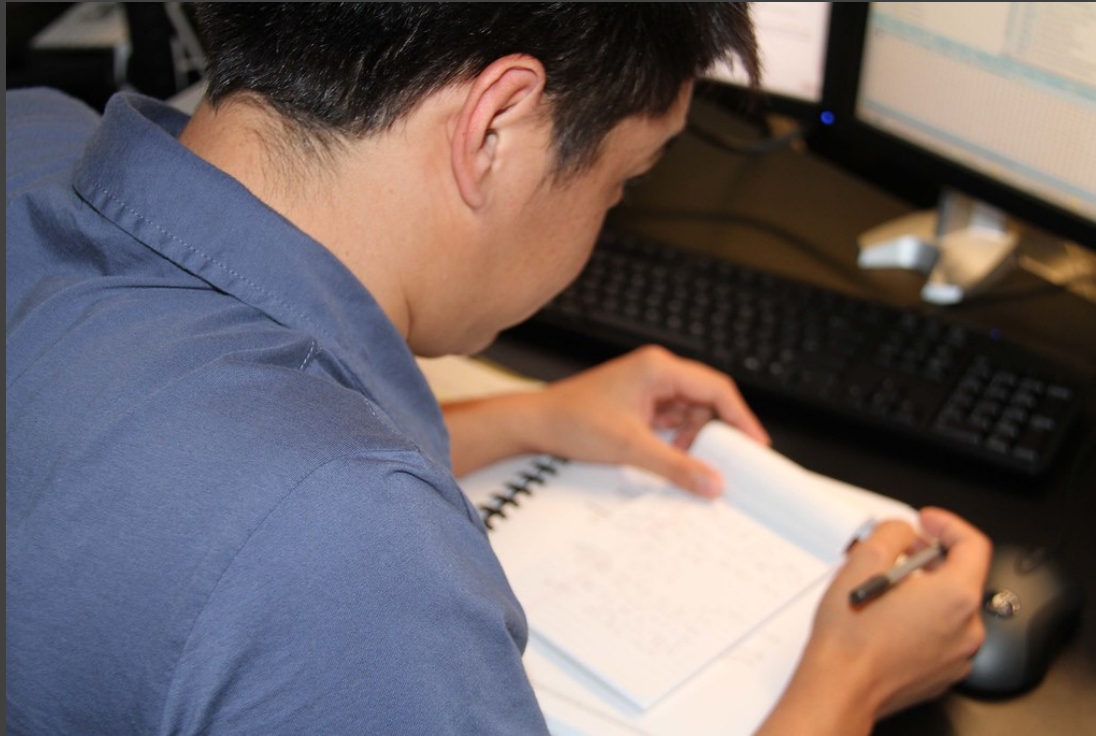

What are such legal instruments and how are they used?

What is the national report?

What should be done to press for a transformative agenda?

Achieving a positive
environment for science

Preparing the 2021 report

**Integrating all these
international reporting
exercises**

**Which indicators and
evaluation methods?**
